**Town of Northborough Announces Selection of
White Cliffs Architect**

NORTHBOROUGH, MA — Town Administrator John Coderre is pleased to announce the execution of a contract between the Town of Northborough and DBVW Architects for the provision of architectural and engineering services at the White Cliffs property.

“I would like to thank the Northborough community for its patience as we worked through the legally required Request for Proposal process needed to hire a consultant for White Cliffs property.” said Mr. Coderre. “The Town appointed White Cliffs Committee interviewed a number of very well qualified firms interested in providing the Town with the expertise to move this project forward. After an extensive interview process and thorough reference checks, it was the unanimous decision of the White Cliffs Committee to award the contract to DBVW. I anticipate a positive and productive working relationship with DBVW as we endeavor to preserve and repurpose this important community asset.”

“DBVW Architects is extremely pleased to have been selected to help the Town of Northborough and the White Cliffs Committee save this very important historic building and chart a course for finding a viable use that will ensure its long-term preservation” said Martha L. Werenfels, AIA, Principal of DBVW Architects.

It is anticipated that DBVW and their associates will begin work to assess the White Cliffs structure and surrounding property immediately. Community members interested in keeping apprised of the status of the White Cliffs project are directed to the White Cliffs Committee Town webpage at:
